

# I-COAT™

Innovative technology for demanding removable applications

I-Coat™ is a unique removable coating that is ideal for Shelf Talker Labels and Tape.

I-Coat™ offers a strong bond that removes clean every time at any temperature for any length of time.

Holds firm and removes clean in the freezer, refrigerator and on ambient shelf strips.

Other tapes promise that they leave “No Residue” and perform well in cold & warm environments but chances are that you have tested and they failed. I-Coat™ can be held to this promise! — ***Request a sample and test for yourself.***

Our coatings are designed for demanding removable applications for Labels, P.O.P., signage, tapes and masking products.

Removes clean from Glass, Stainless, PVC, Acrylic, Wood and more at any temperature...over any length of time.

*We can provide:*

Master rolls up to 24” width

Finished rolls with finger lift down to ½” on ¾”
